

Space — Standalone Exam Paper

One hundred and ten multiple-choice questions on vocabulary, the second conditional and the unit’s reading texts. Every item is answerable on its own — no audio track, and no page references back to the coursebook. **All answers and explanations are at the end, in Part 2.**

Questions	Sections	From the book	Extra practice	Listening items	Answers
110	10	65	45	0	Part 2

Part 1 — The Exam

- 1 Which word means "everything above the Earth"? BOOK

A gravity

B space

C climate

D crew
- 2 An object that is sent into space to collect information is called a: BOOK

A capsule

B rocket

C satellite

D launch pad
- 3 The adjective "lunar" describes something connected with: BOOK

A the Sun

B the Moon

C the stars

D the Earth
- 4 Someone whose job is to explore space is an: BOOK

A astronomer

B architect

C athlete

D astronaut
- 5 The verb "to launch" means: BOOK

A to send something up into the air

B to bring something down to the ground

C to repair a machine

D to travel slowly in a circle
- 6 The verb "to land" means: BOOK

A to send something into the air

B to bring something down to the ground

C to grow food in space

D to float without moving
- 7 A small container in which astronauts live during a space flight is a: BOOK

A capsule

B station

C pad

D disc
- 8 "Exploration" is: BOOK

A the activity of going somewhere never visited by humans before

B the activity of staying safely in one place

C the job of repairing spacecraft

D the science of growing plants

- 9** | **One inch is equal to:** BOOK
- | | |
|---------------------------|----------------------------|
| A 1.54 centimetres | B 2.54 centimetres |
| C 25.4 centimetres | D 39.37 centimetres |
-
- 10** | **A short audio or video file is called a:** BOOK
- | | |
|---------------|-----------------|
| A disc | B record |
| C clip | D report |
-
- 11** | **"Research" means:** BOOK
- | | |
|---------------------------------------|---------------------------------|
| A to look for information | B to travel very quickly |
| C to agree with another person | D to build a machine |
-
- 12** | **Bad weather with rain, thunder and lightning is called a:** BOOK
- | | |
|---------------------|-----------------------|
| A dust storm | B thunderstorm |
| C snowstorm | D sunrise |
-
- 13** | **A round, flat item such as a CD, a DVD or a record is a:** BOOK
- | | |
|---------------|---------------|
| A clip | B seed |
| C pad | D disc |
-
- 14** | **The adjective "golden" means:** BOOK
- | | |
|------------------------------|---|
| A very old and broken | B made of gold, or gold-coloured |
| C extremely fast | D very heavy |
-
- 15** | **A person who works in science is a:** BOOK
- | | |
|---------------------|--------------------|
| A journalist | B presenter |
| C scientist | D passenger |
-
- 16** | **"To imagine" means:** BOOK
- | | |
|---|---|
| A to prove something with facts | B to think or dream about something |
| C to measure something carefully | D to build something with your hands |
-
- 17** | **A type of book or film about space and the future is called:** BOOK
- | | |
|--------------------------|----------------------|
| A science fiction | B a biography |
| C a documentary | D a newspaper |
-

18

"To be proud" means to feel:

BOOK

A worried about a difficult problem**B** tired after a long journey**C** happy because you, or someone you know, did something good**D** angry with a friend

19

Which word is the OPPOSITE of "launch"?

★ EXTRA

A explore**B** land**C** float**D** imagine

20

Which word in this list is a VERB?

★ EXTRA

A exploration**B** lunar**C** golden**D** launch

B Vocabulary: Compound Nouns and Word Building

Questions 21–32

- 21** | **A compound noun is:** BOOK
- A** two words put together to make a new word
- B** a verb written in the past simple
- C** a noun that has no plural form
- D** a question word used with "if"
-
- 22** | **A flat surface from which rockets are sent into space is a:** BOOK
- A** landing strip
- B** launch pad
- C** control room
- D** space capsule
-
- 23** | **"Lunar landing" means:** BOOK
- A** to land a capsule on the Moon
- B** to launch a rocket from Earth
- C** to fly around the Sun
- D** to leave the space station
-
- 24** | **The air that astronauts breathe inside the capsule is the:** BOOK
- A** sunlight
- B** spaceflight
- C** air supply
- D** growing condition
-
- 25** | **The light that comes from the sun is called:** BOOK
- A** moonlight
- B** sunlight
- C** artificial light
- D** starlight
-
- 26** | **"Spaceflight" means:** BOOK
- A** to fly through space
- B** to walk on the Moon
- C** to build a rocket
- D** to watch the stars from Earth
-
- 27** | **"Upward" means:** BOOK
- A** to move down
- B** to move backwards
- C** to move up
- D** to stay still
-
- 28** | **A place where astronauts live in space and carry out research is a:** BOOK
- A** launch pad
- B** rocket engine
- C** space station
- D** space capsule

29

When there is no force holding you down to the Earth, this is called:

BOOK

☐ A zero gravity☐ B artificial light☐ C outer space☐ D extreme weather

30

Light that does NOT come from the sun is called:

BOOK

☐ A daylight☐ B sunlight☐ C moonlight☐ D artificial light

31

Which of the following is NOT a compound noun?

★ EXTRA

☐ A spacesuit☐ B sunlight☐ C astronaut☐ D launch pad

32

The part of a rocket that burns fuel and produces power is the rocket:

★ EXTRA

☐ A capsule☐ B engine☐ C pad☐ D satellite

- 33** | Astronauts wear a _____ to protect them in space. BOOK
- ☐ A launch pad ☐ B spacesuit
- ☐ C space station ☐ D space capsule
-
- 34** | The doctor checked the _____ of the sick patients before the flight. BOOK
- ☐ A climate ☐ B weather
- ☐ C condition ☐ D planet
-
- 35** | Earth, Venus and Mars are all types of _____. BOOK
- ☐ A planets ☐ B satellites
- ☐ C stars ☐ D moons
-
- 36** | _____ is the measure of how warm or cold something is. BOOK
- ☐ A Gravity ☐ B Temperature
- ☐ C Climate ☐ D Weather
-
- 37** | Many scientists say that _____ change is an important issue on our planet. BOOK
- ☐ A condition ☐ B temperature
- ☐ C weather ☐ D climate
-
- 38** | If you don't like the rainy _____, you shouldn't go out this evening. BOOK
- ☐ A weather ☐ B climate
- ☐ C gravity ☐ D planet
-
- 39** | The _____ on the two planets is very different: a person who weighs 100 lbs on Earth would weigh only 38 lbs on Mars. BOOK
- ☐ A temperature ☐ B climate
- ☐ C gravity ☐ D condition
-
- 40** | Mars has _____ weather conditions, with very strong winds and huge dust storms. BOOK
- ☐ A mild ☐ B gentle
- ☐ C calm ☐ D extreme

- 41** | The amount of water and sunlight that a plant needs are called its _____. BOOK
- ☐ A growing conditions ☐ B science experiments
- ☐ C space missions ☐ D plant seeds
-
- 42** | Satellites travel in _____, far beyond the Earth's atmosphere. BOOK
- ☐ A the launch pad ☐ B outer space
- ☐ C the space station ☐ D zero gravity
-
- 43** | When the new astronauts arrived at the space station, the _____ were floating in the air to greet them. ★ EXTRA
- ☐ A seeds ☐ B discs
- ☐ C clips ☐ D crew
-
- 44** | Mona took many different plant _____ with her so that she could grow vegetables in space. ★ EXTRA
- ☐ A seeds ☐ B discs
- ☐ C clips ☐ D inches

45 We use the second conditional to talk about:

BOOK

A something that always happens, like a scientific fact

B something we imagine, which is not real now

C something that happened and finished in the past

D an instruction or an order

46 Which is the correct structure of the second conditional?

BOOK

A If + present simple, will + infinitive

B If + will, would + -ing

C If + past simple, would + bare infinitive

D If + would, past simple

47 If I _____ to space, I would take my camera.

BOOK

A go

B will go

C would go

D went

48 If Omar had a plane, he _____ to many countries.

BOOK

A will travel

B would travel

C travels

D travelled

49 If I _____ an astronaut, I would go to Mars.

★ EXTRA

A am

B were

C will be

D would be

50 She would grow vegetables if she _____ on the space station.

★ EXTRA

A lives

B will live

C lived

D would live

51 Which sentence is grammatically CORRECT?

★ EXTRA

A If I would have a rocket, I would fly to the Moon.

B If I had a rocket, I will fly to the Moon.

C If I had a rocket, I would fly to the Moon.

D If I have a rocket, I would flew to the Moon.

- 52 | Complete the negative sentence: "I _____ go to the sun — it is far too hot." BOOK
- ☐ A wouldn't ☐ B didn't would
- ☐ C not would ☐ D won't would
-
- 53 | If we _____ enough water, the corn wouldn't grow well. ★ EXTRA
- ☐ A don't have ☐ B didn't have
- ☐ C wouldn't have ☐ D haven't
-
- 54 | _____ you go to Mars if you had the chance? BOOK
- ☐ A Will ☐ B Do
- ☐ C Did ☐ D Would
-
- 55 | Where _____ you go if you had a rocket? BOOK
- ☐ A will ☐ B would
- ☐ C do ☐ D did
-
- 56 | In the sentence "If I made a space time capsule, I'd include photos of Burj Khalifa", the short form "I'd" means: BOOK
- ☐ A I had ☐ B I did
- ☐ C I would ☐ D I could
-
- 57 | If NASA sent out more Voyagers, they _____ many years to travel to the edge of the solar system. BOOK
- ☐ A will take ☐ B take
- ☐ C would take ☐ D took
-
- 58 | If I _____ one million dirhams, I would take all my friends and family on a nice vacation. BOOK
- ☐ A have ☐ B will have
- ☐ C would have ☐ D had
-
- 59 | Look at these two sentences: BOOK
(1) "If I go to space, I will be happy." (2) "If I went to space, I would be happy."
Which answer describes them correctly?
- ☐ A (1) is the first conditional and (2) is the second conditional.
- ☐ B (1) is the second conditional and (2) is the first conditional.
- ☐ C Both are second conditional sentences.
- ☐ D Both are first conditional sentences.

60

Which sentence talks about something the speaker only **IMAGINES (it is not real)?**

★ EXTRA

A If I have time, I will write another book next year.

B If I had a spaceship, I would visit Mars every weekend.

C When I go to space, I will take a camera with me.

D I visited the space museum last week.

61

Put the words in the correct order:

BOOK

"would / I / if / grow / went / vegetables / to space / I"

A If I would go to space, I grew vegetables.

B I went to space if I would grow vegetables.

C If I went to space, I would grow vegetables.

D Would I go to space if I grew vegetables.

62

Complete the sentence from an interview about space: "Sports _____ be difficult in space, because the gravity is different."

BOOK

A will

B would

C are

D did

63 Which phrase would you use to **AGREE** with someone?

BOOK

A I'm not so sure.**B** You're right.**C** I don't really agree.**D** I'm afraid that's wrong.**64** Which phrase would you use to **DISAGREE** politely with someone?

BOOK

A Me too.**B** I agree.**C** You're right.**D** I'm not so sure.**65** In a compound noun, the first word usually:

BOOK

A describes the second word**B** means the opposite of the second word**C** replaces the second word**D** changes the tense of the second word**66** We use an expanded noun phrase in our writing in order to:

BOOK

A give the reader more information about the noun**B** ask the reader a question**C** show when the action happened**D** make the sentence shorter**67** Which of these is an expanded noun phrase?

BOOK

A the planet**B** she travelled**C** the red planet in space**D** very quickly**68** In the noun phrase "the old spaceship", which word gives the additional detail?

BOOK

A the**B** old**C** spaceship**D** the spaceship**69** In the noun phrase "a tiny, rocky planet", the **MAIN NOUN** is:

★ EXTRA

A tiny**B** rocky**C** planet**D** a**70** Which sentence correctly expands the noun phrase "a beautiful sunset"?

★ EXTRA

A a beautiful sunset over the red mountains**B** sunset beautiful a**C** beautifully sunset**D** the sunset beautiful

F Reading Comprehension: Facts from the Unit Texts

Questions 71–80

71 In which year did scientists send the Golden Record into space?

BOOK

A 1957

B 1969

C 1977

D 2021

72 The Golden Record was carried into space on the spacecraft called:

BOOK

A Voyager 1

B Explorer One Dubai

C Apollo 11

D Sputnik

73 The Golden Record contains greetings in how many languages?

BOOK

A 12

B 40

C 50

D 55

74 Which of these sounds from Earth can be found on the Golden Record?

★ EXTRA

A wind, rain and thunderstorms

B cars and aeroplanes

C telephones ringing

D football matches

75 Abdulla Al Shamsi, who wrote a science-fiction book about living on Mars, is a famous:

BOOK

A scientist

B athlete

C doctor

D journalist

76 According to the interview, why must astronauts who travel to Mars be strong?

BOOK

A Because they might live on Mars for a very long time and cannot just come back.

B Because they have to carry very heavy equipment on Earth.

C Because they are not allowed to sleep during the journey.

D Because they must build the rocket themselves.

77 What is the astronaut Mona's mission at the International Space Station?

BOOK

A To repair a broken satellite.

B To take photographs of the surface of Mars.

C To help conduct science experiments to grow vegetables in space.

D To build a new launch pad.

78

How long did the journey to the International Space Station take?

★ EXTRA

A Two hours

B Two days

C Two weeks

D Two months

79

In Mona's experiment, which plant grew the best?

BOOK

A The corn

B The zucchini

C The potatoes

D All three grew at exactly the same speed

80

Why was the corn plant growing slowly?

BOOK

A It was getting enough sunlight, but not enough water.

B It was getting enough water, but not enough sunlight.

C It was getting no light at all.

D It was planted too late in the mission.

81 | The rocket will _____ from the launch pad at exactly six o'clock in the morning. ★ EXTRA

A land	B launch
C explore	D float

82 | Complete the pair: an astronaut travels in space, and a sailor travels on the _____. ★ EXTRA

A sea	B sky
C desert	D mountain

83 | Which word does **NOT** describe the weather? ★ EXTRA

A thunderstorm	B dust storm
C strong wind	D telescope

84 | Which word is the noun that names the activity of exploring? ★ EXTRA

A explorer	B exploration
C explorable	D explored

85 | A person who explores new places is called an _____. ★ EXTRA

A exploration	B explorer
C exploring	D explored

86 | Which word means “moving gently in the air without falling”? ★ EXTRA

A floating	B landing
C launching	D growing

87 | Choose the correct sentence. ★ EXTRA

A The astronauts collected many informations about Mars.	B The astronauts collected a lot of information about Mars.
C The astronauts collected an informations about Mars.	D The astronauts collected many information about Mars.

88 | Which is the correct spelling? ★ EXTRA

A satelite	B satellite
C sattelite	D satellight

89

Which is the correct spelling?

★ EXTRA

A astronaut

B astronaute

C astronout

D asstronaut

90

Which of these words is an adjective?

★ EXTRA

A gravity

B extreme

C launch

D crew

91 Which definition matches the compound noun **spaceship**?

★ EXTRA

A a vehicle that travels in space

B a ship that sails on the sea

C a room inside a space station

D a very bright type of star

92 Which pair of words makes a real English compound noun?

★ EXTRA

A moon + light

B space + light

C star + pad

D rocket + lunar

93 In the compound noun **space station**, which word tells you the **type of station**?

★ EXTRA

A space

B station

C both words equally

D neither word

94 Which compound noun is made of a **verb + a noun**?

★ EXTRA

A launch pad

B outer space

C zero gravity

D science fiction

95 “A suit that is worn in space” can be written as one compound noun:

★ EXTRA

A spacesuit

B suitspace

C space’s suit

D suit space

I Extra Practice: The Second Conditional

Questions 96–105

96 | If she _____ more about Mars, she would write a book about it.

★ EXTRA

A knows

B knew

C will know

D would know

97 | We _____ take a spaceship if we wanted to visit the Moon.

★ EXTRA

A will

B would

C did

D are

98 | Which question is written correctly?

★ EXTRA

A What will you do if you saw an alien?

B What would you do if you saw an alien?

C What would you did if you see an alien?

D What you would do if you saw an alien?

99 | “If I didn’t have a telescope, I wouldn’t see the stars so clearly.” What is true about the speaker?

★ EXTRA

A The speaker has a telescope.

B The speaker does not have a telescope.

C The speaker is going to buy a telescope.

D The speaker sold a telescope last year.

100 | If there _____ water on Mars, humans would find it much easier to live there.

★ EXTRA

A is

B were

C will be

D would be

101 | If the plants _____ enough light, they wouldn’t grow at a normal rate.

★ EXTRA

A don’t get

B didn’t get

C wouldn’t get

D not get

102 | “I don’t have a rocket, so I don’t travel to the Moon.” Which second conditional says the same thing?

★ EXTRA

A If I had a rocket, I would travel to the Moon.

B If I have a rocket, I will travel to the Moon.

C If I had a rocket, I will travel to the Moon.

D If I would have a rocket, I travelled to the Moon.

103

Which sentence is **NOT** a second conditional?

★ EXTRA

A If I went to Mars, I would take seeds with me.

B If I had a spacesuit, I would float outside the station.

C If I go to the museum, I will see a real rocket.

D If we lived on the space station, we would float every day.

104

_____ you take your family with you if you moved to Mars?

★ EXTRA

A Would

B Will

C Do

D Are

105

In the second conditional, the verb that comes after **would** is:

★ EXTRA

A the bare infinitive, e.g. take

B the past simple, e.g. took

C the -ing form, e.g. taking

D the past participle, e.g. taken

106 Which noun phrase gives the reader the most information?

★ EXTRA

A a planet**B** a red planet**C** a small red planet**D** a small red planet with two moons**107** In the noun phrase “huge dust storms that blow over the whole planet”, the main noun is:

★ EXTRA

A huge**B** dust**C** storms**D** planet**108** Which sentence puts the adjectives in the correct order?

★ EXTRA

A We watched a beautiful red sunset.**B** We watched a red beautiful sunset.**C** We watched a sunset red beautiful.**D** We watched beautiful a red sunset.**109** Which sentence contains an expanded noun phrase?

★ EXTRA

A The rocket launched.**B** It was very cold.**C** The old silver rocket on the launch pad was ready.**D** They waited quietly.**110** The phrases “You’re right” and “Me too” are both used to:

★ EXTRA

A agree with someone**B** disagree with someone**C** ask someone a question**D** say goodbye politely

Answers with explanations

Section A — Vocabulary: Word Meanings (1–20)

1 **B** **space**

Space is defined as everything above (beyond) the Earth.

2 **C** **satellite**

A *satellite* is an object sent into space to collect information.

3 **B** **the Moon**

Lunar means "of the Moon", so a *lunar capsule* is a Moon capsule.

4 **D** **astronaut**

An *astronaut* is a person who travels to and explores space.

5 **A** **to send something up into the air**

Launch = to send something into the air, as with a space rocket.

6 **B** **to bring something down to the ground**

Land = to bring something down onto a surface, e.g. "The lunar capsule lands on the Moon."

7 **A** **capsule**

A *capsule* is a small container where astronauts live and travel.

8 **A** **the activity of going somewhere never visited by humans before**

Exploration is the activity of travelling to a place that has never been visited.

9 **B** **2.54 centimetres**

An *inch* is 2.54 centimetres.

10 **C** **clip**

A *clip* is a short audio or video file.

11 **A** **to look for information**

Research is looking carefully for information.

12 **B** **thunderstorm**

A *thunderstorm* is bad weather with rain, thunder and lightning.

13 **D** **disc**

A *disc* is a round, flat item like a CD, DVD or record.

14 **B** **made of gold, or gold-coloured**

Golden = made of gold or gold in colour, as in the *Golden Record*.

15 **C** **scientist**

A *scientist* is a person who works in science.

16 **B** **to think or dream about something**

To imagine is to think or dream about something that is not real.

17 **A** **science fiction**

Science fiction is a type of book or movie about science, space and the future.

18 **C** **happy because you, or someone you know, did something good**

To be proud = to feel happy because you or someone you know did something good.

19 **B** **land**

Launch sends something up into the air; *land* brings it back down. They are opposite actions.

20 **D** **launch**

Launch is a verb (an action). *Exploration* is a noun; *lunar* and *golden* are adjectives.

Section B — Vocabulary: Compound Nouns and Word Building (21–32)

21 **A** **two words put together to make a new word**

A compound noun is made of two words joined together to make one new word, e.g. *launch* + *pad* = *launch pad*.

22 **B** **launch pad**

Launch (to send into the air) + *pad* (a flat surface) = *launch pad*.

23 **A** **to land a capsule on the Moon**

Lunar (of the Moon) + *landing* = landing a capsule on the Moon.

24 **C** **air supply**

Air supply is the air that astronauts breathe inside the capsule.

25 **B** **sunlight**

Sun + light = sunlight, the light from the sun.

26 **A** **to fly through space**

Space + flight = flying through space.

27 **C** **to move up**

Up + ward = moving in an upward direction.

28 **C** **space station**

A *space station*, such as the International Space Station, is where astronauts live and do research.

29 **A** **zero gravity**

Zero gravity means there is no force pulling you towards the Earth, so astronauts float.

30 **D** **artificial light**

Artificial light is light made by people, for example from a lamp or a battery.

31 **C** **astronaut**

Astronaut is a single word, not two words joined together. The others are all made of two words.

32 **B** **engine**

Rocket + engine = rocket engine, the part that gives the rocket its power.

Section C — Vocabulary in Context (33–44)

33 **B** **spacesuit**

A *spacesuit* is the suit astronauts wear to protect them in space.

34 **C** **condition**

Condition is used for the state of someone's health.

35 **A** **planets**

Earth, Venus and Mars are *planets*.

36 **B** **Temperature**

Temperature measures how warm or cold something is.

37 **D** **climate**

The fixed expression is *climate change*.

38 **A** **weather**

Weather describes the conditions on one particular day (rainy, sunny, windy).

39 **C** **gravity**

Gravity is the force that pulls things down, and it is much weaker on Mars than on Earth.

40 **D** **extreme**

The text describes Mars as having *extreme* weather conditions.

41 **A** **growing conditions**

Growing conditions are the water, light and other things a plant needs in order to grow.

42 **B** **outer space**

Outer space is the area beyond the Earth's atmosphere.

43 **D** **crew**

The *crew* is the group of people who work together on a spacecraft or space station.

44 **A** **seeds**

Plants grow from *seeds*, so she took plant seeds with her.

Section D — Grammar: The Second Conditional (45–62)

45 **B** **something we imagine, which is not real now**

The second conditional talks about something we imagine in the present or the future, but which is not real.

46 **C** **If + past simple, would + bare infinitive**

The pattern is: **If + past simple, would + bare infinitive**, e.g. *If I went to space, I would take a camera.*

47 **D** **went**

After *if* in the second conditional we use the past simple: *went*.

48 **B** **would travel**

The result clause uses *would* + bare infinitive: *would travel*.

49 **B** were

In the second conditional we use the past form of *be*, and *were* is used for all persons: *If I were an astronaut ...*

50 **C** lived

The *if* clause takes the past simple, even when it comes second in the sentence: *if she lived.*

51 **C** If I had a rocket, I would fly to the Moon.

Only C follows the rule *If + past simple, would + bare infinitive*. We never use *would* directly after *if* in this structure.

52 **A** wouldn't

A negative second conditional result uses *wouldn't + bare infinitive*.

53 **B** didn't have

The *if* clause needs a negative past simple: *didn't have*.

54 **D** Would

To make a second conditional question we start with *Would + subject + bare infinitive*.

55 **B** would

After the question word we use *would*: *Where would you go ...?*

56 **C** I would

In the second conditional, *'d* is the short form of *would*.

57 **C** would take

The result clause of a second conditional uses *would + bare infinitive*: *would take*.

58 **D** had

The *if* clause uses the past simple: *had*.

59 **A** (1) is the first conditional and (2) is the second conditional.

Sentence (1) uses *present simple + will* (first conditional, a real possibility). Sentence (2) uses *past simple + would* (second conditional, imagined).

60 **B** If I had a spaceship, I would visit Mars every weekend.

Only B uses the second conditional (*had ... would visit*), which shows an imaginary situation.

61 **C** If I went to space, I would grow vegetables.

The correct order follows *If + past simple, would + bare infinitive*.

62 **B** would

The speaker is imagining life in space, so the second conditional form *would be* is used.

Section E — Grammar: Noun Phrases and Functional Language (63–70)

63 **B** You're right.

You're right, Me too and *I agree* are used for agreeing.

64 **D** I'm not so sure.

I'm not so sure and *I don't really agree* are used to disagree politely.

65 **A** describes the second word

In a compound noun the first word describes the second, e.g. *space mission* tells you the exact type of mission.

66 **A** give the reader more information about the noun

Expanded noun phrases add extra detail so the reader knows more about what is being described.

67 **C** the red planet in space

The red planet in space is a noun phrase with extra information added (*red, in space*).

68 **B** old

Spaceship is the main noun; *old* is the additional information that describes it.

69 **C** planet

Planet is the main noun; *tiny* and *rocky* are adjectives that describe it.

70 **A** a beautiful sunset over the red mountains

A is a correct, natural expansion: the extra phrase *over the red mountains* adds more detail about the sunset.

Section F — Reading Comprehension: Facts from the Unit Texts (71–80)

71 **C** 1977

The Golden Record was sent into space in **1977**.

72 **A** **Voyager 1**

NASA sent the Golden Record to space on **Voyager 1**.

73 **D** **55**

There are greetings in **55 languages** on the Golden Record.

74 **A** **wind, rain and thunderstorms**

The record holds sounds from Earth such as **wind, rain and thunderstorms**, and even animal noises.

75 **B** **athlete**

He is described as a famous **athlete** who has written a science-fiction book about living on Mars.

76 **A** **Because they might live on Mars for a very long time and cannot just come back.**

The astronauts have to be strong because they might be living on Mars for a very long time; they can't just come back.

77 **C** **To help conduct science experiments to grow vegetables in space.**

Her mission is to help conduct science experiments to grow vegetables, such as zucchini, in space.

78 **B** **Two days**

It is described as a **two-day trip** to the ISS, flying at over 28,000 kilometres per hour.

79 **C** **The potatoes**

The **potatoes** grew the best — in fact, at the same rate as they would grow in nature.

80 **A** **It was getting enough sunlight, but not enough water.**

The corn was getting just enough sunlight to grow, but not enough water to grow at a normal rate.

Section G — Extra Practice: Vocabulary and Spelling (81–90)

81 **B** **launch**

We *launch* a rocket when we send it up into the air from a launch pad.

82 **A** **sea**

An astronaut belongs to space in the same way that a sailor belongs to the sea.

83 **D** **telescope**

A *telescope* is an instrument for looking at the stars. The other three are all types of weather.

84 **B** **exploration**

Exploration is the activity itself; an *explorer* is the person who does it.

85 **B** **explorer**

The suffix *-er* makes the person: explore → *explorer*.

86 **A** **floating**

In zero gravity astronauts are *floating* — they stay in the air instead of falling.

87 **B** **The astronauts collected a lot of information about Mars.**

Information is uncountable: it has no plural and takes *a lot of*, not *many*.

88 **B** **satellite**

The correct spelling is *satellite* — one *t*, then double *l*.

89 **A** **astronaut**

The correct spelling is *astronaut*.

90 **B** **extreme**

Extreme describes a noun (extreme weather), so it is an adjective. *Gravity* and *crew* are nouns and *launch* is a verb.

Section H — Extra Practice: Compound Nouns and Word Building (91–95)

91 **A** **a vehicle that travels in space**

Space + ship = a ship that travels through space, i.e. a spacecraft.

92 **A** **moon + light**

Moonlight is the light that comes from the moon. The other three combinations are not English words.

93 **A** **space**

In a compound noun the first word describes the second, so *space* tells you exactly which kind of station it is.

94 **A** **launch pad**

Launch is a verb and *pad* is a noun. In the others the first word is an adjective or a noun.

95 **A** **spacesuit**

The describing word comes first, giving *spacesuit*.

Section I — Extra Practice: The Second Conditional (96–105)

96 **B** **knew**

The *if* clause of a second conditional takes the past simple: *knew*.

97 **B** **would**

The result clause takes *would* + bare infinitive: *would take*.

98 **B** **What would you do if you saw an alien?**

A second conditional question is *question word + would + subject + bare infinitive*, with the past simple after *if*.

99 **A** **The speaker has a telescope.**

The second conditional imagines the opposite of what is real. The imagined situation is *not* having a telescope, so in reality the speaker **does** have one.

100 **B** **were**

This is an imagined situation, so we use the past form *were* after *if*.

101 **B** **didn't get**

A negative *if* clause in the second conditional uses *didn't* + bare infinitive.

102 **A** **If I had a rocket, I would travel to the Moon.**

The real situation is negative, so the imagined version turns it positive: *had ... would travel*.

103 **C** **If I go to the museum, I will see a real rocket.**

Option C uses *present simple + will*, which is the first conditional — a real possibility, not an imagined one.

104 **A** **Would**

Second conditional questions begin with *Would* + subject + bare infinitive.

105 **A** **the bare infinitive, e.g. take**

Would is always followed by the bare infinitive — the verb with no *to* and no ending.

Section J — Extra Practice: Noun Phrases and Functional Language (106–110)

106 D a small red planet with two moons

Each option adds more detail, and option D adds the most: size, colour and an extra fact about its moons.

107 C storms

The phrase is about *storms*; *huge*, *dust* and the words after *that* are all extra detail describing them.

108 A We watched a beautiful red sunset.

In English an opinion adjective (*beautiful*) comes before a colour adjective (*red*).

109 C The old silver rocket on the launch pad was ready.

The old silver rocket on the launch pad is a noun phrase expanded with several details about the rocket.

110 A agree with someone

Both are agreeing phrases; *I'm not so sure* and *I don't really agree* are used to disagree.

Source: Unit 2 “Space”, Coursebook and Workbook pages 29–50 — Ministry of Education, United Arab Emirates. Questions marked BOOK test words, rules and facts taken directly from the unit; questions marked ★ EXTRA extend the same material with new sentences, spelling, word-building and odd-one-out items.

Listening activities are excluded, and no question asks the student to look back at the book.
